I am to advise you in accordance with Regulation 42(8)(a) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, that the EPA has made a determination that an Appropriate Assessment is required as the project, individually or in combination with other plans or projects, is likely to have a significant effect on European sites. Notification of this determination is attached for your reference. The EPA acknowledges receipt of a Natura Impact Statement, submitted on 22 May 2023.

In carrying out an Appropriate Assessment the EPA shall take into account each of the matters specified in Regulation 42(12) of the European Communities (Birds and Habitats) Regulations 2011 as amended, where applicable.

The EPA shall publish a Notice for Public Consultation on Appropriate Assessment under Regulation 42 of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended.

Appropriate Assessment Screening Determination

In accordance with Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, the Agency has undertaken Appropriate Assessment screening to assess, in view of best scientific knowledge and the conservation objectives of the site, if the waste water discharges, individually or in combination with other plans or projects is likely to have a significant effect on European Sites. In this context, particular attention was paid to the European Sites listed below.

	Dalkey Islands SPA (Site Code: 004172)
Date of AA Screening Determination:	01 June 2023

AA Screening Determination:

That the waste water discharges not directly connected with or necessary to the management of any

European site and that it cannot be excluded, on the basis of objective information, that the waste water discharges individually or in combination with other plans or projects, will have a significant effect on any European site and accordingly determined that an Appropriate Assessment of the waste water discharges is required, and for this reason determined to require the applicant to submit a Natura Impact Statement.

This determination has been made in light of the potential for impacts from waste water discharges on the water dependent qualifying habitats and species of South Dublin Bay and River Tolka Estuary SPA (Site Code: 004024), South Dublin Bay SAC (Site Code: 000210), North Bull Island SPA (Site Code: 004006), North Dublin Bay SAC (Site Code: 000206), Rockabill to Dalkey Island SAC (Site Code: 003000), Howth Head Coast SPA (Site Code: 004113) and Dalkey Islands SPA (Site Code: 004172). The waste water discharges (primary discharge and discharges from storm water overflows and emergency overflows) are located either adjacent to or within 10km of the European Sites and are hydrologically connected with the qualifying interests of the Sites.
