

EIA Screening Determination

In accordance with Section 83(2A) of the EPA Act 1992, as amended, the Agency has, as part of its consideration of the Industrial Emissions licence application review referenced below, determined whether the application should be made subject to an Environmental Impact Assessment (EIA) as respects the matters that come within the functions of the Agency. The determination, and the reasons for the determination, are detailed below.

Application Details:

Reg No.	W0136-04
Applicant Name:	Starrus Eco Holdings Limited
Location of installation:	Sarsfieldcourt Industrial Estate, Sarsfieldcourt, Glanmire, Cork, T45 R585
Authorisation Type	Licence
Licence Application Date:	09 February 2023
Date of EIA Screening Determination:	14.06.2023

EIA Screening Determination:

EIA, as respects the matters that come within the functions of the Agency, is not required for the activity to which the above licence application relates due to the following reasons:

The changes to the activity are below the specified threshold of project type 13 in Part 2 of Schedule 5 of the Planning and Development Regulations 2001 as amended:

13. Changes, extensions, development and testing

(a) Any change or extension of development already authorised, executed or in the process of being executed (not being a change or extension referred to in Part 1) which would: -

(i) result in the development being of a class listed in Part 1 or paragraphs 1 to 12 of Part 2 of this Schedule, and

(ii) result in an increase in size greater than –

- 25 per cent, or

- an amount equal to 50 per cent of the appropriate threshold,

whichever is the greater.

Having considered the information provided by the applicant, which satisfies the requirements of Annex II A of the EIA Directive, it has been determined that the changes to the activity are not likely to give rise to significant effects on the environment by virtue of its nature, size or location. This determination has been made having regard to the following:

- There is no proposed increase in the permitted maximum annual quantity of waste to be accepted at the installation in the licence review application.
- The changes to the activity will not result in any process emissions to water or sewer.

- The changes to the activity are not likely to result in significant dust, noise or odour emissions.
- The cumulative effect with other existing and/or approved projects will not be significant.

Submissions on a licence application can be made before the Proposed Determination is issued. Information on the public participation process is available on the Agency's website at www.epa.ie.
