

Waste generated includes office and canteen waste, waste oils and spent batteries and wastewater. SEHL implements waste prevention, minimisation and segregation procedures to minimise the amounts of wastes arising and ensure that as much as possible is recycled and recovered.

Office wastes, including miscellaneous electrical and electronic equipment and light bulbs, are segregated at source and then sent for recovery at authorised facilities. Canteen waste is source segregated and sent for biological treatment at an authorised facility. Waste oils and filters and spent batteries arising from plant maintenance are sent off-site for treatment at authorised facilities. End of life plant and equipment items are sent to metal recycling facilities. The washwater from the vehicle wash and sanitary waste water discharge to the foul sewer.
