**TO WHOM IT CONCERNS**

***Re: Martin & Angela O'Donovan - EPA LICENCE***

*This is to confirm that I act as Veterinary Surgeon to the above pig unit.*

*I visit the pig unit on a regular basis, and review the operation with the owners;  
Between these farm visits we discuss as required any items which may have  
impact on the health, productivity, or welfare of the herd.*

*The operation is well managed, achieves excellent output, and the records which  
are up to date, show whether significant issues need to be addressed. The set-up  
is modern which in turn creates a good environment for the stock, and a  
pleasant place to work.*

*The drug register shows which products are used to prevent disease and to treat  
disease when it does occur.*

*The owners run a modern, efficient unit which meets the current environmental  
and welfare demand, and I am confident they will do so into the future.*
