Re Amazon Data Services, DCC Planning Ref 3200/20

Mairead,

I confirm that planning application 3200/20 did not include an Environmental Impact Assessment Report and that an Environmental Impact Assessment was not required due to the development proposed being an EIA sub threshold development and considering the nature and scale of the development it would not have had significant effects on the Environment.

The grounding permission for this facility Ref 2229/19 did not include an Environmental Impact Assessment and the Planning Authority in the assessment of that application concluded that *the subject project would be sub-threshold for EIA. It is further considered that the proposal does not meet the tests set out in Schedule 7 of the Planning and Development Regulations, 2001(as amended)*,

Billy Joe Padden
