

## Attachment 7-1-3-3 Receiving Environment Report

Refer to the Attachments outlined in Table 1 for a comprehensive overview of the receiving / existing environment at the Amazon Data Services Ireland Limited (ADSIL) Data Centre facility (hereafter referred to as '*The Installation*'). For each relevant environmental thematic, a description of the existing/receiving environment is presented in the referenced attachment.

**Table 1: Baseline environment information attachment reference guide**

Environmental Thematic	Attachment Name
Geology	Attachment-4-8-2-Baseline Report
Hydrogeology	Attachment-4-8-2-Baseline Report Attachment-7-1-3-2-Soil Water Impact Assessment
Soils	Attachment-4-8-2-Baseline Report
Surface Water	Attachment-4-8-2-Baseline Report Attachment-7-1-3-2-Soil Water Impact Assessment
Flooding	Attachment-4-8-2-Baseline Report
Areas of Special Interest	Attachment-4-8-2-Baseline Report
Air Quality	Attachment-7-1-3-2-Air Emissions Impact Assessment
Noise	Attachment-7-1-3-2-Noise Emissions Impact Assessment

A further description of the receiving environment at the Installation including details on underlying soils, geology and hydrogeology is included within this application in Attachment-4-8-4-Site Condition Report.

It is not proposed to reproduce this information here as information on the receiving environment has been included in the relevant sections of the IE licence application, as outlined above.
