Reg. No.: P1186-02

Further Notice under the EPA (Industrial Emissions) (Licensing) Regulations 2013, in respect of a licence review from Amazon Data Services Ireland Limited for an installation located at Clonsaugh Business and Technology Park, Dublin 17.

Dear Sir or Madam,

I refer to the EPA's notice of 21 January 2025 requesting information in respect of your licence review application.

You are advised that there remains outstanding information, as required under the EPA (Industrial Emissions) (Licensing) Regulations 2013, as amended. You are therefore required to submit the outstanding information detailed below:

1. Sewer: Applicant's response to Sewer Question 3 states "The downstream hydrocarbon interceptor is designed to capture other regulated discharge prior to entering the foul sewer, thus ensuring that only stormwater is leaving the site." Provide clarity on how the discharge/ emissions captured by hydrocarbon interceptor(s) are disposed of.
2. Air: Results regarding air modelling differ greatly in the applicant's response from results included in Attachment-7-1-3-2-Air Emissions Impact Assessment. Submit an updated Attachment-7-1-3-2-Air Emissions Impact Assessment ensuring that all information is correct, and that results of the predicted environmental concentration (PEC) being used to determine compliance with the ambient air quality standards is included.
3. Appropriate Assessment: Provide updated information regarding appropriate assessment of potential noise and air impacts from the overall development (to include existing and proposed development) and potential in-combination effects with other developments.

With a view to advancing this application for determination, the above mentioned information should be submitted to the EPA by 28 March 2025.

Note that where the licensee fails to comply with this requirement in full and to the satisfaction of the Agency, the Agency may consider, having regard to the extent of the failure, whether the application can be considered pursuant to Regulation 10(2)(b)(ii) of the Environmental Protection Agency (Industrial Emissions)(Licensing) Regulations 2013 as amended, and may issue a notice in writing that the application cannot be considered by the Agency, outlining the extent of such failure. Alternatively, where there is a failure to comply with this requirement the Agency may activate Regulation 19 of the Environmental Protection Agency (Industrial Emissions)(Licensing) Regulations 2013 as amended which pertains to Withdrawal or Abandonment of an application for licence.

Your prompt attention to this matter is requested.

Yours Sincerely,

Brid Horgan
