**RE: EPA Industrial Emissions Licensing Application P1186-02 – Additional Information**

Dear Sir/Madam,

On behalf of the applicant, Amazon Data Services Ireland Limited (**ADSIL**), thank you for meeting with us yesterday to discuss the following points:

- Discrepancies, clarifications and additional information required
- The approach to the cumulative air impact assessment and application of EPA Guidance AG4 (Item 4)
- Clarification regarding MCPs to identify location of each MCP on the ADSIL site (Item 5)
- Material usage
- Extension of time request for responding to the Request for Information, dated 28<sup>th</sup> May 2025

In relation to the above, it was agreed that for the cumulative impact assessment (Items 2 and 4), ADSIL will continue to adhere to the EPA Guidance AG4 (EPA, 2020) and specifically the methodology outlined in Figure A2 of Appendix E of AG4. ADSIL will ensure that clear justification for the assessment approach is included in the relevant reports. Furthermore, it was confirmed that the material usage calculations would be based on the maximum operating limits being applied for.

ADSIL is committed to conducting a thorough review of the licence application (Reg. No. P1186-02) and providing a comprehensive response to the EPA's Request for Information, dated 28<sup>th</sup> May 2025. As discussed during the meeting on 3<sup>rd</sup> June 2025, noting the number of items requested in the RFI, ADSIL respectfully requests an extension of time until **11<sup>th</sup> July 2025** to allow sufficient time to conduct a full review of the licence application and comprehensively address all requested items.

Please do not hesitate to contact us should you have any questions regarding the above information.

Sincerely,

Jonathan Gauntlett

Principal Environmental Consultant
